(SHORT FORM)
GUIDING LITE2™ DOCK REFLECTOR

Supply Guiding Lite2™ Dock Reflectors as manufactured by Erich Industries, Inc., Verona, WI. DockSafety.com, (800) 882-5839. Reflectors shall safely guide trucks into the proper position at the loading dock even with minimal light conditions. Energy saving, cost-effective design shall require no electricity to operate and no bulbs to burn out. Reflectors shall be constructed of advanced retro-reflective, microprismatic material with reflective brilliance of up to 900 candle power certified under retro-reflective intensity testing procedures ASTM E809 and E810. Reflective material shall provide superior weatherability in cold, heat, and wet conditions and exceeds Federal Specification L-S-300C, ASTM Standard No. D 4956 and FED-STD-370. Reflective material shall be radio frequency (RF) weld sealed to a reinforced vinyl backing and include brass grommets in each corner for mounting. Model GL2-018Y 4' wide x 18" long yellow or Model GL2-018W 4" wide x 18" long white. Reflectors shall remain reflective when viewed at wide entrance. Units shall require no electricity to operate. No substitutions will be considered.
